

EXHIBIT B

SUMMARY OF CHANGES TO THE UPDATED STANDARD SPECIFICATIONS

The following is a summary of major changes made during the revision process of the Districts' Standard Specifications.

- Incorporated the new Separation Criteria requirements from the California State Department of Health Services (DHS), issued in May 2003.
- Updated references to specific manufacturers and model numbers of various pipeline equipment and appurtenances.
- Eliminated details regarding boring and jacking of pipeline, as these requirements are usually project-specific.
- Renumbered all drawings and detail references to account for added and deleted drawings.
- Completed the conversion of one copy to a *.pdf format in order to allow for posting the Standard Specifications on the Districts' respective websites.
