

Edward C Little Water Recycling Facility Water Efficient Demonstration Garden – Phase I

Goal: The goal of this project is to create a demonstration garden that is residential-friendly so that the visitors of the Facility can learn how to create their own water conservation garden at their home. This is Phase I of a 2-phase project and will be completed before Water Harvest in October. Phase II consists of a demonstration area in the vicinity of the fountain and to the east of the fountain. Phase II is anticipated to be completed in spring 2010.
