

# West Basin Municipal Water District WATER FOR TOMORROW

## **WATER FOR TOMORROW** Securing Our Water Future

Southern California's water supply is increasingly less reliable. There are unpredictable ebbs and flows to the imported drinking water that we receive, environmental and regulatory decisions that impact supply availability, reoccurring and prolonged droughts, uncertain impacts of climate change and other factors that indicate even more preparation is needed to be ready for our next challenge.

The Water for Tomorrow Program is West Basin's approach to addressing the service area's water future. Water for Tomorrow brings new emphasis to West Basin's commitment to protecting, securing and diversifying its water supply while continuing its history of innovation and industry leadership.

We invite you to learn more about our current and future water supply.

### **Protect the District's existing water supply**

West Basin is dedicated to protecting its existing water supply and securing local, drought-resilient resources.

### **Diversify and augment our water supply portfolio**

The District's top priority is to diversify and augment its supply portfolio responsibly and efficiently.

### **Innovate to prepare for the future**

West Basin leadership and its continued dedication to innovation are preparing us for the needs of tomorrow.
