

WEST BASIN MUNICIPAL WATER DISTRICT WATER USE REPORT FISCAL YEAR 2013-2014

www.westbasin.org

WATER USE REPORT Fiscal Year 2013-2014

17140 S. Avalon Blvd., Suite 210 Carson, CA 90746 www.westbasin.org

Finance

- Received an Excellence in Financial Reporting Award notification for West Basin's Comprehensive Annual Financial Annual Report (CAFR) for the FY 2012-13 from the Government Finance Officers Association (GFOA);
- Received Excellence in Budget Recognition from GFOA and the California Society of Municipal Finance Officers (CSMFO); and
- Approved the annual rates in April 2014 and the annual budget in May 2014 that meets the Board's financial metrics of a 1.35 overall debt coverage, meets its Designated Funds Policy limits, and responsibly budgets for its sales assumption in response to the declaration of a state-wide drought in January 2014.

Capital Improvement Program

- Completed feasibility study efforts and initiated design of the Hyperion Effluent Pump Station Expansion and Secondary Electrical Feed Project. The pump station project will provide additional capacity to serve future recycled water demands and add a second power source to the existing Hyperion Effluent Pump Station to improve reliability and redundancy to West Basin's overall recycled water supply system;
- Applied for several grants for the conservation and recycled water programs as well as for ocean-water desalination research and development;
- Completed several replacement and refurbishment projects including replacement of a hypochlorite tank, a cable replacement project and a variable frequency drive (VFD) replacement all of which occurred at the Edward C. Little Water Recycling Facility;
- Awarded a contract for the design of the South Gardena Lateral. This lateral is partially funded by West Basin, Los Angeles Department of Water and Power (LADWP) as well as a grant from the Department of Water Resources;

- Completed the Title 22 Alkalinity Improvements preliminary design review. This preliminary design review assessed the need and feasibility for nitrified water upgrades to improve water quality and enhance production capacity;
- Completed the tertiary Membrane Bioreactor (t-MBR) Pilot Study at the Juanita Millender-McDonald Carson Regional Facility. The pilot study investigated a new type of t-MBR treatment to potentially produce a sixth type of recycled water for West Basin's customer; and
- Completed the Ocean-Water Desalination Water Quality Integration Study that assessed the potential challenges of introducing desalinated ocean water directly into the local distribution system.

Water Recycling Operations

- At Los Angeles Air Force Base, implemented back-up potable supply for toilet and urinal flushing using recycled water to assure reliability;
- Held Site Supervisor Training for new site supervisors, and staff at existing sites;
- Installed surge tank to protect West Coast Basin Barrier Pipeline;
- Installed 3,846 membranes for Phase II, III, and IV microfiltration systems;
- Executed new recycled water Operations and Maintenance agreement with United Water Environmental Services;
- Increased the Chevron Refinery's nitrified demand by 30 percent; and
- Conducted a demonstration test and implemented the use of a coagulant chemical, a ferric blend, to save costs.

Public Information & Conservation

- Worked with various schools and city facilities to install water efficiency measures;
- The South Bay Environmental Services Center conducted over 40 Cash for Kitchen Audits;
- Added Water 101 classes in Carson at Donald L. Dear building;
- Attracted over 2,000 attendees to last year's Annual Water Harvest educational festival;
- Signed up several car washes for the Ocean Safe car wash coupon program;
- Piloted new Rain Barrel Distribution and Smart Sprinkler Exchange Programs;
- Continued active tour program for the Water Education Center and Ocean-Water Desalination Demonstration Facility for elected officials, sponsors, media and industry V.I.P's even though the plant is no longer active;
- Overhauled the community giveaway program to primarily include practical water conservation devices in the future;
- Continued WR2020 program outreach and obtained over 10,000 community supporters for the program, including several new businesses, city commissions, as well as individuals willing to testify before regulatory agencies on behalf of WR 2020; and
- Constructed three Ocean Friendly Demonstration Gardens at the following locations: City of Carson Community Center, City of Hawthorne City Hall, and Palos Verdes High School.

Water Policy and Resource Development

- Conducted a workshop with the customer agencies to review proposed FY 2013-14 budget and water rates;
- Planned and implemented first Greater Los Angeles Water Summit to attract local elected officials throughout Los Angeles County to a one-day water issues conference;
- Educated local, state and federal elected officials on matters related to local water supply needs, and West Basin's Water Reliability 2020 program to develop new, reliable local water supplies;
- Increased state and federal advocacy efforts related to securing project and program funding for the service area through the potential 2014 Water Bond and Water Resources Development Act (WRDA);and
- Played a key role in assisting the Greater Los Angeles County Region in receiving funding for a \$25 million implementation grant and a \$1 million planning grant under the Integrated Regional Water Management Program, including a recycled water project to serve four sites in the City of Gardena.

Water Quality Monitoring Program

- Completed annual customer water quality reports for two participating retailers; and
- Completed laboratory services required to comply with federal Safe Drinking Water Act and California Title 22 Drinking Water regulation such as analyses of all inorganic, organic compounds, and radioactivity.

Finance

- Meet with rating agencies to discuss upcoming debt issuances to support efforts towards accomplishing the goals of Water Reliability 2020; and
- Update Long-Range Financial Model to project revenue needs, capital funding and appropriate rates and charges.

Capital Improvement Program

- Implement various treatment and conveyance facility repair, replacement, and rehabilitation projects to maintain and improve facility operations and ensure a long-term reliable water supply for West Basin's customers;
- Finalize design efforts for the Los Angeles Harbor Area Expansion project to serve Los Angeles Department of Water and Power (LADWP) refinery customers with over 9,000 AFY of high-quality nitrified Title 22 water. Design efforts include expansion of the existing Juanita Millender-McDonald Carson Regional Water Recycling Facility and approximately 3-miles of new 30-inch diameter conveyance pipeline through the City of Carson;
- Finalize the design of the South Gardena Lateral to serve four new local customers with approximately 120 acre-feet of recycled water. This partnership with LADWP and the Department of Water Resources will involve the construction of 1.25 miles of recycled water pipeline within the South Gardena;

- Implement the Title 22 Alkalinity Process Upgrades recently studied at the Chevron and ExxonMobil Refineries. This upgrade will supply the refineries with improved water quality and will reduce the costs for breakpoint chlorination operations on site; and
- Complete EIR for planned future Full-Scale Ocean-Water Desalination Program implementation. The EIR will assess all environmental related impacts associated with implementing Full-Scale Ocean-Water Desalination treatment facilities, intake and discharge systems, and full conveyance and pumping systems. The EIR will allow for certification in compliance with the California Environmental Quality Act.

Water Recycling Operations

- Continue making infrastructure improvements to achieve 100 percent recycled water injection at the seawater Barrier;
- Implement the prioritized asset management recommendations to maximize the asset life and optimize maintenance activities;
- Seek out and apply for grant funding to maximize opportunity for expansion of recycled water for new customers;
- Evaluate existing processes to improve operations;
- Complete implementation of automated system for retrieval and compilation of water quality laboratory data, and submit to various regulatory agencies to improve accuracy and provide more opportunity for proactive analysis of results; and
- Continue to support existing customer water quality inquiries.

Public Information & Conservation

- Focus on drought messaging and publicize Water Use Efficiency and Conservation programs;
- Continue to improve our education programs, including pre- and post-testing by adding additional information on the West Basin website;
- Plan to publish a new value brochure to provide our customers with information about how West Basin efficiently plans, invests and builds cutting edge water facilities;
- Continue to implement the WR 2020 outreach program and launch a new desalination section on the West Basin website;
- Continue to develop new communication vehicles to showcase West Basin's "new" brand and value;
- Host annual Water Harvest festival to reach to the community and continue educational and value focus;
- Continue to update the exhibits and educational facilities at the ECLWRF;
- Coordinate frequent meetings with media focused on current issues facing the water industry and West Basin;
- Build nine more Ocean Friendly Demonstration Gardens throughout the service area for a total of 16 gardens; and
- Execute six Water 101 courses for the public and universities.

Water Policy and Resource Development

- Continue to provide a forum for exchange of information and perspectives on West Basin policies and programs as well as statewide water policy issues including a possible 2014 Water Bond and the Bay Delta Conservation Plan;
- Ensure that any state and federal legislation regarding potential local government and/or water supply funding incorporate a "diverse" approach, which provides funding opportunities for conservation, water recycling, and ocean-water desalination;
- Continue West Basin's advocacy efforts related to West Basin's request for an increased Federal authorization for the Harbor South Bay project, through the Water Resources Development Act of 2012;
- Continue leadership role in the Greater Los Angeles County
 Integrated Regional Water Management Program, including
 administration, on behalf of the Region, of its financial resources;
- Continue to play a leading role in the development of policy and legislative matters; as well as the advocacy activities for CalDesal and WateReuse;
- Continue program to honor Legislators of the Year with Water Reliability 2020 awards; and
- Continue to defend West Basin service area and MWD as a whole against litigation, legislation and other efforts intended to work against cooperative regional water management policy.

Water Quality Monitoring Program

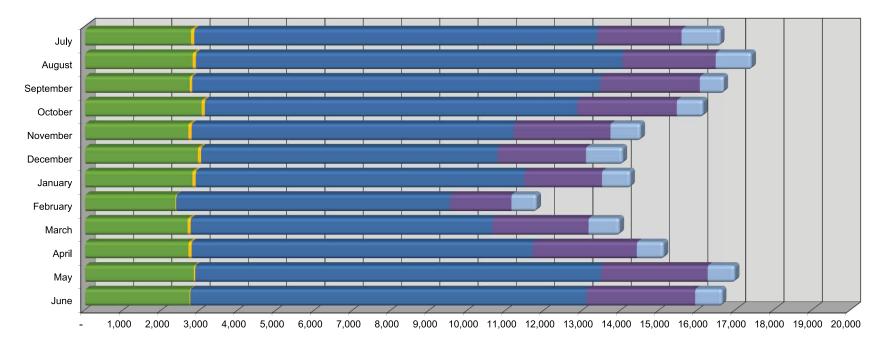

- Complete annual customer water quality reports for two participating retailers; and
- Continue to assist water purveyors in meeting their water quality reporting requirements.

**Non-Interruptible water purchased is for the West Coast and Dominguez Gap Seawater Barriers.

***All recycled water purchased is for the West Coast Seawater Barrier.

WATER RECYCLING PROGRAM

CURRENT & PLANNED PROJECTS

In 2009, West Basin completed a Capital Implementation Master Program (CIMP). The CIMP includes all of the planned projects for recycled water and desalination through the year 2030. The WR2020 program includes doubling recycled water deliveries by the year 2020, and the projects that will achieve this goal are described in detail in the CIMP. The major recycled water capital projects taking place in the more immediate term are explained in further detail below.

Tesoro Refinery Capacity Expansion Project

Purpose: Provide 2.59 mgd of increased supply to the Tesoro Refinery by constructing a tertiary-Membrane Biological Reactor (t-MBR); and fully restoring the MF capacity back to contract requirement.

Benefits: This project will increase the supply of recycled water to Tesoro; will improve water quality of the nitrified effluent; reduce breakpoint chlorination to the current nitrified effluent, thereby reducing the chloride content of the wastewater; optimize the Tesoro blend of RO & nitrified water used in their cooling tower; and remove total suspended solids and colloidal iron concentration.

Project Completion Date: FY 2015-2016

Hyperion Secondary Effluent Pump Station

Purpose: The Hyperion Secondary Effluent Pump Station provides wastewater to the Edward C. Little Water Recycling Facility (ECLWRF).

Benefits: This project will increase secondary effluent pumping capacity and improve system reliability with redundant power supply.

Project Completion Date: FY 2015-2016

Water Quality Facility Improvements

Purpose: To improve or sustain the water quality provided to the recycled water customers through improvements to existing facilities. Several water quality improvements, such as treatment facility improvements, disinfection booster station facilities, and backup potable water supplies are required throughout West Basin's distribution system to meet customer and regulatory specifications.

Benefits: Water quality improvements will address customer requirements and maintain a consistent and reliable water supply source.

Completion Date: FY 2015-2016

Nitrified Water Alkalinity Process Upgrades

Purpose: Construct new Nitrified Water Alkalinity Upgrades to maintain and improve overall treatment processes at West Basin satellite facilities, Chevron Refinery and ExxonMobil Refinery.

Benefits: Construction of the Nitrified Water Alkalinity Process Upgrades will improve water quality, enhance production capacity, and reduce operational chemical costs for breakpoint chlorination.

Completion Date: FY 2014-2015

South Gardena Lateral

Purpose: Once completed, the project is anticipated to serve approximately 120 acre-feet per year (AFY) of recycled water.

Benefits: The South Gardena Lateral will connect three new recycled water customers: Gardena High School, South Garden Park, and Roosevelt Memorial Association. Sites will reduce reliance on imported water.

Completion Date: FY 2015-2016

|--|

Universal Microfiltration Pilot

Purpose: The project will allow West Basin to assess a currently non-existent universal vessel to house different microfiltration manufacturers.

Benefits: A universal microfiltration unit will provide greater competition in bidding situations and allows flexibility to change manufacturers as products and objectives change.

Completion Date: FY 2014-2015

Customer Development and Retrofit Projects

Purpose: Customer developed projects assist in making connections and retrofits to new recycled water customers. The Dominguez Tech Center is a possible recycled water customer. In order to serve the Dominguez Tech Center with recycled water, an engineering analysis will be performed to determine the best connection locations and retrofits needed prior to constructing the connections.

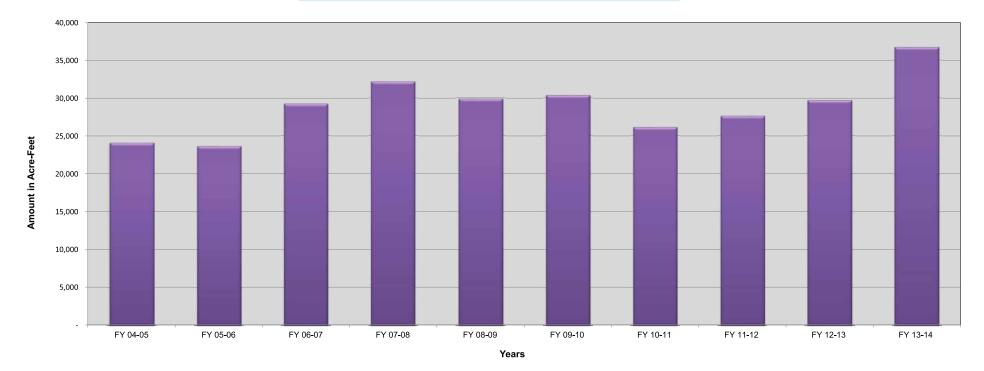

Benefits: Providing new customers recycled water and reducing dependence on imported water.

Completion Date: On-going
