*West Basin – Providing a safe and reliable supply of high-quality water to the communities we serve.*

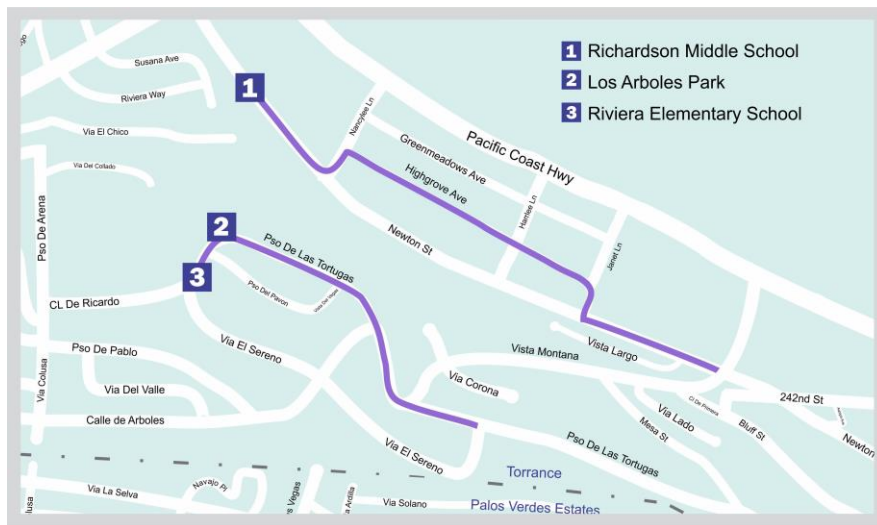

West Basin Municipal Water District is constructing a new recycled water pipeline that will expand recycled water use in the City of Torrance and bring the first drop of recycled water to the Palos Verdes Peninsula.

### What to Expect

Project activities include open trench construction, excavation and backfill work, deliveries of materials and use of construction equipment.

- Intermittent lane closures, parking restrictions and turn restrictions in work areas; “No Parking” signs posted in advance
- Some noise, dust and vibration during work activities
- Local access to Newton Street for residents on Vista Largo will be maintained at all times
- Through-traffic will be maintained at all times
- Access to driveways and businesses maintained at all times
- No disruption to utility, trash and delivery services

### Location

Work will occur on the following streets highlighted in purple: Newton Street, Highgrove Avenue, Nancy Lee Lane, Paseo De Las Tortugas and Calle De Ricardo.

### Background

The Palos Verdes Recycled Water Pipeline Project is a new 3.5-mile-long recycled water pipeline that will connect to West Basin’s existing system at Anza Avenue and Calle Mayor in Torrance and deliver recycled water for irrigation purposes to Lago Seco and Los Arboles “Rocketship” Parks, Richardson Middle School, Riviera Elementary School, medians on PCH and Anza Avenue and the Palos Verdes Golf Club. The project also includes a booster pump station located at Lago Seco Park in Torrance that will store the pumps needed to carry recycled water to higher elevations.
